

PRE-CONDICIONAMENTO PODIUM

PODIUM 1

Complementary starter compound feed for the conditioning of suckling calves

Nutritional Value (per ton)

Crude protein	16,50 %	Vitamin A	10.000.000 UI
Crude fat	3,00 %	Vitamin D3	2.000.000 UI
Crude fiber	5,00 %	Vitamin E	6.000 mg
Ashes	5,30 %	E5 Manganese.....	60.000 mg
Sodium	0,44 %	E6 Zinc	82.500 mg
Calcium	0,60 %	E4 Copper	2.000 mg
Phosphor	0,47 %	E2 Iodine	1.250 mg
		E8 Selenium	255 mg
		E3 Cobalt	1.000 mg

Additions

Urea 0,8 % (máx.)

Supplying Mode

Supply at discretion to calves up to 6 months of age. Urea should only be given to animals with functional rumen. The maximum dosage of urea should be achieved progressively. The maximum urea content should only be given to animals as part of food regimes rich in readily digestible carbohydrates and reduced in soluble nitrogen. Ureic nitrogen should account for no more than 30% of the total nitrogen in the daily feed. Always keep clean water at the animals' disposal.

Composition

See product label.

Shelf Life

Use preferably before the date inscribed on the label.

Presentation

Flour or granulated.

Package

Paper bag with 30 kg net weight.

Storage conditions

Store in the original package in a cool and dry place, away from direct sunlight.
